

## **Henry H. Bernstein, DO**

Henry H. Bernstein, DO has just recently become Chief of the Section of General Academic Pediatrics at Dartmouth-Hitchcock Medical Center and Visiting Professor of Pediatrics at Dartmouth Medical School, after ten years as associate chief of the division of general pediatrics at Children's Hospital Boston and associate professor of pediatrics at Harvard Medical School.

In addition, Dr. Bernstein is a member of the American Academy of Pediatrics' (AAP) Committee on Infectious Diseases, and as a member, is responsible for developing and revising AAP guideline for control of infectious diseases in children.

Dr. Bernstein's focus has always been to promote the health of children, their families, and the communities where they live in the primary care setting. Extensive experience as a primary care pediatrician in a variety of settings places him in a most unique and rewarding position.

He holds leadership roles in medical education, has been described as a master educator and received several teaching awards, and conducts primary care clinical research while maintaining a clinical primary care practice. Cognizant of the need for the outcome of learning to go beyond recall of content, he dedicates significant time and effort on the development of new and innovative tools to facilitate learning that enhances clinical judgment and practice, and results in improved health of patients.

Clinical research is consistently woven into the fabric of his primary care practice, which serves as a "laboratory" for active primary care research. Project areas include health promotion, preventive health services, technology, medical education, advocacy, and clinical immunization development, education, and delivery. His clinical office-based research studies have had significant impact on the practice of primary care pediatrics and national policy.

Dr. Bernstein earned his medical degree from the University of Medicine and Dentistry of New Jersey School of Osteopathic Medicine in Stratford, New Jersey. He completed his residency training in pediatrics at St. Christopher's Hospital for Children in Philadelphia and received his undergraduate degree in mathematics and biology from Union College in Schenectady, New York.
